Description

An individual GF+1 house built in 2026, designed for families who value generous space, superior thermal performance and a high technical standard. The property is in the interior finishing phase — structure and all installations are complete — allowing buyers to personalise finishes to their own specification. Situated on a 423 sqm plot in Tunari, Ilfov, the house provides 142 sqm usable area and 163 sqm built area across two well-defined levels.

Tunari, Ilfov – fast access to A3 motorway, Airport and Baneasa Mall

FAQ

What is the total area of the house and how are the spaces distributed?

The house provides 142 sqm usable area and 163 sqm built area across two levels on a 423 sqm plot. The ground floor offers 69 sqm usable area: living+dining of 31 sqm usable area, separate kitchen of 17 sqm usable area, guest WC, technical room, hallways and a terrace of 8 sqm usable area. The upper floor covers 73 sqm usable area: master bedroom of 26 sqm usable area with en-suite bathroom, two bedrooms of 14 sqm usable area and 13 sqm usable area, hallway bathroom and a balcony of 4 sqm usable area.

Is the house fully completed or still under construction?

The exterior and structural works are complete. Interior finishing is in progress — floor tiles, wall tiles, flooring and doors are yet to be installed, and the courtyard is to be landscaped. All technical installations including heating, air conditioning and windows are in place and operational.

What heating and cooling systems does the property include?

The house features underfloor heating across both levels with an individual thermostat in each room. Every room is equipped with a Gree 12,000 BTU air conditioning unit, included in the property, providing immediate thermal comfort once interior finishes are completed.

What advantages do the glazing and insulation systems offer over standard construction?

Salamander 6-chamber windows with triple glazing, warm edge bars and external sills eliminate thermal bridges and deliver superior airtightness. Combined with 15 cm Swisspor external insulation, the building envelope significantly reduces energy consumption compared to minimum construction standards.

How well connected is Tunari and what amenities are nearby?

Tunari provides direct access to the A3 motorway, Bucharest ring road and Henri Coandă International Airport. Lidl, Penny, Baneasa Mall and Therme are a short drive away. The American School and Scoala

Gimnaziala nr. 1 Tunari are nearby, and the STV 459 bus line provides public transport links to northern Bucharest.
